Description

The CNIO's Human Cancer Genetics Programme currently comprises five groups that span a broad scope of translational research in different areas related to the genetic bases of familial cancer, the study of genetic and environmental risk factors, pharmacogenetics, and the analysis of the molecular mechanisms and biological modelling of chromosome rearrangements. We are seeking a scientist to establish a group in a related area within this Programme.

Se Requiere

- A Ph.D. and/or M.D. degree and at least four years of postdoctoral experience as well as an outstanding track record of publications.
- Excellent leadership and communication skills to direct an independent and competitive research group.
- A collaborative vision to foster interactions with other groups at the CNIO.
- Research experience in human cancer genetics or familial cancer.
- Applications must include a detailed CV, a synopsis of research experience, a research proposal and at least two letters of reference.

Se Ofrece

- A superb working environment with a multidisciplinary approach to cancer research equipped with state-of-the-art technology and core facilities.
- A five-year contract, renewable upon positive evaluation, with a competitive salary and an attractive benefits package.
- Two additional fully-funded positions as well as a start-up budget for equipment, consumables and running costs until the investigator can secure his/her own funding (3 year limit).
- Access to fully funded, bright and highly motivated graduate students and postdoctoral fellows via the international PhD and postdoc programmes.
- Institutional support for all the core units.
- A mentoring programme.
